

H2G 3.0

Technical data	
LENGTH	3004 mm
WIDTH	785 mm
FRONT HEIGHT	900 mm
BACK HEIGHT	1130 mm
WEIGHT	460 kg
TANK CAPACITY	200 lt
POWER - VOLTAGE	KW 4,5 - V 400

NEEDLE-BED WASHING MACHINES for knitting machines

info@gali8.com
www.knitting-machines.it

SIMPLE AND AUTOMATIC

One of the strengths of H2G is the software: intuitive, easy-to-use and designed to allow an automatic management of the entire washing cycle.

PROGRAMMING FLEXIBILITY

The software allows the choice of four levels of washing: HEAVY, MEDIUM, RAPID, ULTRA-RAPID, depending on the quantity of dirty on the needlebeds, just like a domestic dishwasher. The recommended washing temperature is 40°C, regardless the cycle employed.

H2G PATENTED TECHNOLOGY

H2G is an innovative machine made of stainless steel, which allows the cleaning of the needlebeds of knitting machines of any brand. The patented spray-technology of h2g water ensures a quick and perfect cleaning of the needlebeds of any gauge and any size, without the need of demounting needles.

The optimization of the time and performance is one of our main objectives, for this reason H2G is equipped with a system able to detect automatically the shape of the needlebeds and customize the washing cycle in function of the size of the elements.

RAPIDITY

How long does it take for a washing?
About one hour, regardless the gauge of the needlebed, including the process of drying

EFFICIENT AND ECOLOGICAL

The presence of a filter for the gathering of dirty and oils allows the reuse of the same washing fluid several times, up to a maximum of 20 hours of work with the full tank (200 liters). The change of water can be programmed according too your needs. An alert on the monitor will solicit the substitution of the filter
